

## Company Policy Statement on the Environment

The operations at Calder Industrial Materials include the design, manufacture and installation of lead and lead alloy products using techniques including melting, casting, rolling, cutting, extruding, forging and machining. We also sell a range of purchased products to the roofing trade.

The company operates an Environmental Management System (EMS) to ISO 14001:2015. The EMS is designed to help us deliver on our commitment to protect the environment and ensure we can achieve continuous improvement in environmental management. It will detail how we will:

- Set clear environmental objectives and targets.
- Conduct regular reviews of our performance against these objectives and targets.
- Fulfill all our compliance obligations.
- Identify internal and external issues that affects the company's ability to achieve the intended outcomes of the EMS.
- Control information to ensure it is correct and up to date.
- Regularly review relevant legislation and other requirements to ensure we comply.
- Promote environmental awareness and seek suggestions for improvement.
- Operate in a responsible manner to prevent pollution.
- Encourage our customers and suppliers to demonstrate environmental concern.
- Identify all interested parties, and their needs and expectations, that are relevant to the EMS.
- Integrate energy management into our everyday business activities.
- Develop an energy use profile to highlight energy issues and allow us to target specific areas.
- Seek continuous improvement in environmental performance.
- Conduct Environmental Monitoring in accordance with our EPR permit.

All personnel employed by the company will be suitably trained to provide them with the skills and knowledge necessary to satisfy this policy.

Signed.....
